Students are encouraged to complete an average of 15 credit hours each semester or 30 credit hours each year, which could include spring and/or summer terms. Taking fewer credits substantially increases the cost and the number of semesters to graduate.

**Note:** The above course of study provides a guide in planning. However, to meet special needs and interests of each student, the courses taken and the order in which they are taken may require alteration. Study the requirements, plan a course of study, and consult with an advisor early in the program. This will save considerable time and minimize frustration.

**FEDERAL REGISTER REQUIREMENTS:** The federal register requirements for environmental science ecology or physical science emphasis can be met by choosing appropriate electives. Ecology requires 30 semester hours of basic and applied biology, including at least 9 semester hours of ecology and 12 hours of physical and mathematical sciences. Physical science requires 25 semester hours of physical sciences (chemistry, physics, math, etc.).

**THE DISCIPLINE:**
This degree educates and trains students in the fundamentals of biogeochemistry, ecology, and biology relating to soil and water conservation, quality, and pollution. Through core courses and environmental labs, students will understand the science, politics, and ethics behind current problems facing the environment—locally, regionally, nationally, and globally; learn and practice effective research techniques in field and lab settings (i.e., testable hypotheses, utilization of the scientific method, and environmental testing procedures); and conduct and design basic environmental quality measurements and site assessments. We strive to help students foster and promote environmental stewardship within their own realms of influence.

**CAREER OPPORTUNITIES:**
Bachelor’s Degree: environmental compliance inspector, natural sciences manager, environmental scientist and specialist, hydrologist, NEPA planner, recycling solutions associate, environmental site assessor, environmental consultant, ecological resource specialist, staff scientist, park naturalists, fish and game officer, range manager, water resource specialist, brownfield redevelopment specialist and site manager, environmental restoration planner.

Master’s Degree: environmental business consultant; natural resource and conservation consultant/scientist; principal soil consultant, principal water consultant; environmental, soil, or water scientist for local, state, or national governmental agencies [i.e., Bureau of Land Management (BLM), Natural Resource Conservation Service (NRCS), United States Environmental Protection Agency (EPA), United States Department of Agriculture (USDA), United States Department of Energy (DOE)].

Doctorate Degree: professor of natural resource and conservation, senior water or soil natural resources scientist.

**HANDS-ON LEARNING OPPORTUNITIES:**
Students are encouraged to seek mentored research opportunities early as part of PWS 494R: Mentored Learning Experience and participate in the multiple study abroad programs (China, Africa, South America, and South Pacific-Australia) organized by the Environmental Science faculty.

**FINANCING:**
Scholarships are available for qualified students from the department, college, and university.

**ENVIRONMENTAL SCIENCE CLUB:**
Environmental Science majors participate in the BYU Environmental Science Club. The club is student lead and organizes career network and educational opportunities in fun, social, environmental settings. Fund-raising efforts support educational and networking trips every semester.

**MAP DISCLAIMER**
While every reasonable effort is made to ensure accuracy, there are some student populations that could have exceptions to listed requirements. Please refer to the university catalog and your college advisement center/department for complete guidelines.
